

# IAMMonitor

- Login to IAMMonitor via mobile device
- Access the page named Sync
- Press the download button
- Selected routines and other essential data are stored on mobile device
- Select a routine
- Instantly see any alarms raised by readings that have been made
- Select a reading of interest

Assumes mobile device has active Internet connection when initially setting up.

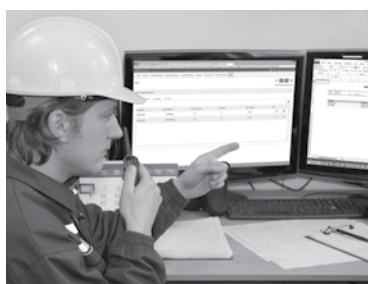

- Select your routine
- Scan barcode/RFID tag (if appropriate)
- Record reading of the gauge, monitor, sensor etc.
- If alarm flashes report to your supervisor

Offline

IAMMonitor can also be used with connectivity allowing instant reading updates to be fed back to the office.

- Press the upload button to save data back to server.
- All data entered offline will now be saved to the server.

Assumes mobile device has active Internet connection when saving data back to server.
