IAMAsbestos has been developed in collaboration with BP Exploration and BP Chemicals to enable all aspects of the control of asbestos within the oil, gas, power and chemical industries (survey, sample gathering, certification, risk assessment scoring and remedial action planning) to be managed from one easy-to-use system. IAMAsbestos will enable you to remain compliant with HSG 264 and the Control of Asbestos Regulations 2012 – second edition 2013.

Better Compliance Management

In an environment where it is imperative to demonstrate conformity with standards for the management of asbestos within premises and assets, IAMAsbestos provides an online secure data facility to store and manage compliance data, photographs, risk assessments, analysis documentation and historical data for improved compliance management.

Quickly determine if your defects have been mitigated by their due date.

★ Benefits

Add Value To Work Planning & Permit Issuing

Ideal for use by permit issuers, iam asbestos facilitates safe planning and complements permit issue prior to work taking place. IAMAsbestos locations can be viewed simply and quickly by clicking on the 'asbestos on map' function.

Improve Safety

IAMAsbestos grants asset owners the ability to manage asbestos information for all areas of their premises and assets (buildings, process areas and off-sites). IAMAsbestos reduces the risk of exposure to staff and contract personnel.

Access can be given on an administration or read-only basis (via a secure username and password) to key personnel, such as permit issuers and team leaders, allowing those with responsibility the necessary access to input and modify asbestos data, while at the same time restricting those that only need to read asbestos data, company management plans and the latest health and safety information.

Deliver Best Practice

IAMAsbestos makes it easy for asbestos coordinators to input asbestos data within simple-to-use forms designed to comply with the latest health and safety standards (Control of Asbestos Regulations 2012 – second edition 2013), allowing asset owners to demonstrate that they are effectively managing asbestos within the work environment.

IAMAsbestos is an innovative, simple-to-use management system that improves the management of asbestos and allows the user to be fully compliant with the latest hse guidelines and approved codes of practice. IAMAsbestos is a means of managing and reducing your asbestos footprint.

Accessible from any device that has internet access, iam asbestos enables all responsible personnel to fulfil their role in the safe management of this hazardous material.

At a glance

- ✓ Complies with 'Control of Asbestos Regulations 2012 – second edition 2013'
- ✓ Provides easy to use tools for the inputting and administration of survey data
- ✓ Manages data capture and data sharing of all asbestos data from a single remotely accessed web based system
- ✓ Allows the inputting of historical asbestos data
- ✓ Stores survey photographs and lab analysis results
- ✓ Generates a risk assessment score that conforms to the HSE guidelines
- ✓ Archives original data when updates are made to a survey, retaining an audit trail
- ✓ Create actions referencing the site or responsible person, giving a review date for re-inspection, contacting the responsible persons by email by action due date
- ✓ Improves the safety of staff and contract workers by displaying 'Asbestos on map'
- ✓ Calculate the total quantity of asbestos on an asset.

Compatible with

Iamtech are experts in the creation of software to help the oil, gas, power and chemical industries remain compliant with the latest asbestos regulations and reduce their asbestos footprint while providing a means of quality assurance when recording asbestos locations within the workplace.
