IAMSafety

IAMSafety is incident management software for the oil, gas, power and chemical industries. Safety is paramount for all kinds of industrial assets, such as offshore rigs, oil refineries and chemical processing plants. IAMSafety is available to you and your colleagues for free for the first 12 months of use. After that, it costs only £99 per user per year.

⭐ IAMSafety Benefits

✓ Using IAMSafety will help you dramatically improve consistency in information gathering and visibility for all your end users via an online dashboard.

✓ Add to an incident or accident file by uploading videos, audio testimony or documents relating to the event.

✓ IAMSafety enables a further means of quality assurance when dealing with reportable injuries, near-miss incidents and day-to-day safety management, enabling you to remain DSEAR-compliant.

✓ Information is shared between operator and office instantly.

✓ Eliminates the need for paper-based processes.

✓ IAMSafety can be integrated with Tr@ction.

IAMTech are experts in fit-for-purpose software for the oil, gas, power and chemical industries.
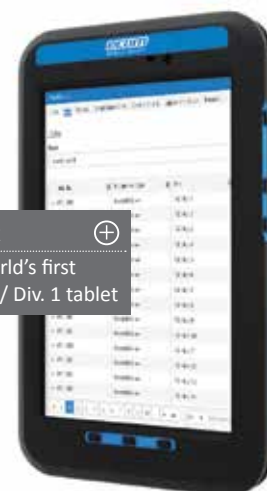

Manage your health, safety and environmental risk with IAMSafety. IAMSafety is intrinsically safe mobile management software to gather safety and near-miss incidents in real time and management reporting via an online dashboard.

IAMSafety is the perfect solution for Safety Officers and Process Operators that are required to track near-miss incidents and accidents on a regular basis, providing organisations with the visibility they need to manage risk from an individual through to an entire global organisation.

IAMSafety is a comprehensive, easy-to-use, cloud-based incident reporting and safety recording system, which not only provides all the tools you need to keep your employees and business safe, but helps you to visualise and qualify your personnel risk and improve your HSE performance management.

IAMSafety can also be integrated with our ISSOW (Integrated Safe System of Work).

THIS SOFTWARE IS FREE when purchased with an intrinsically safe device. Visit **www.iamtech.com** to see our full range of devices.

Our professional services team are available to integrate Safety with SAP, Maximo or any other ERP you are using.
