

Price List

IAMThermal and IAMDispersion are dynamic software solutions which sets the standard for emergency pre-planning, training and emergency response and is so simple you do not have to be genius to use it!

IAMThermal

IAMThermal allows emergency planners, emergency responders and SHE/HSE managers to quickly model industrial fires such as Storage Tank, Bund / Dyke, Spill and Jet Fires, on top of Google Earth to determine impact to asset and personnel.

IAMDispersion allows emergency planners, emergency responders and SHE/HSE managers to quickly model chemical gas releases in the atmosphere, such as liquid pool / spill evaporation, gas release from a continuous pressure source and instantaneous mechanical failure, on top of Google Earth to determine impact to site personnel and surrounding population centres.

IAMDispersion
